

Quality, Environment and Safety Policy

QUALITY CHEMICALS, S.L. and PURITY CHEMICALS, S.L. are two companies dedicated to the development, manufacture and marketing of fine chemical products and reagents for synthesis.

Our main objective is to meet the expectations of our customers, achieve our own personal satisfaction and improve and strengthen our competitiveness and expansion into the market. To achieve this we commit ourselves to:

Customer Satisfaction

- Provide our customers with products and services that meet or exceed their needs and expectations.
- Work with reliable suppliers, both in delivery time and the quality of products, in order to ensure proper service to our customers.
- Adapt the procedures of both companies to deliver products to the pharmaceutical industry and related, according to the GMP-ICH-Q7, while maintaining a competitive differential compared to other manufacturers.

Continual Improvement

- Measure the improvements in the effectiveness of our management systems, setting annual objectives.
- Requirements of our customers will change over time, so we must improve our work processes continuously. Therefore, objectives will be being set to obtain increasingly high levels of quality.

Staff

- Each employee is responsible for the quality and should transmit this responsibility to all its partners, both internal and external.
- Provide information and training for employees to achieve continual improvement.
- Managing human capital, valuing the employees in their talent and skills to achieve the principles of quality policy.

Management System

- Maintain a management system that meets the requirements of ISO 9001, ISO 14001, ISO22000 and OHSAS18001.
- Comply with all applicable legal requirements.
- Review our management system to constantly check its robustness.

Environment

- Protect the environment as a key factor in the development of our activity. Through commitment to continuous improvement and pollution prevention
- Minimize the quantity, hazard and environmental impact of waste streams generated.
- Avoid unnecessary use of resources.

Security

- Provide a safe environment for our employees and visitors.
- Incorporate risk prevention in decision making. All members of the organization should consider the Occupational Health and Safety as a priority responsibility.

Food Safety

- Produce safe products that comply with current legislation and food safety requirements agreed under conditions of safety and hygiene.
- Maintain adequate communication with other participants in the food chain to ensure proper flow of information on issues that affect the safety of products.
- Establish internal communication of everything related to the system throughout the organization, to ensure the safety of manufactured products .

The implementation of this policy is a fundamental objective of the Management Direction and the responsibility of all staff to focus all his actions to add value to the principles set out in it.

Lluís Aragonès
General Manager
