Mastering Industry Excellence

Expertise Beyond Boundaries

At Quality Chemicals, we transcend industry norms to deliver tailored expertise rooted in our extensive 90-year journey. As leaders in high-purity mineral salt manufacturing, we offer specialized knowledge across pharma & biopharma, baby food & nutraceuticals, personal care, veterinary, industrial, and laboratory reagents. Our profound expertise empowers us to understand the unique intricacies of each sector, allowing us to precisely tailor our services while complying with various compendial and pharmacopeial standards, offering multi-compendial products.

Pioneering Excellence in Pharmaceuticals

In the pharmaceutical industry, where purity and compliance are paramount, we stand as a trusted partner to all our clients. Our products uphold the highest quality standards, as evidenced by our GMP certification and adherence to ICH guidelines, as well as our compliance with pharmacopoeias such as the EP, USP, JP, CP, etc. With a wide array of over 40 API registrations, we extend our reach to serve clients worldwide, providing registered drug master files, and backed by endless regulatory support.

Empowering Health and Well-being in Baby Food and Nutraceuticals

In the food and nutraceutical industries, top-tier ingredients are essential for consumer health and well-being. Our meticulous manufacturing processes and

testing ensure products meet the highest purity and regulatory standards. This ensures both effectiveness and compliance with FCC and EU food regulations while managing perchlorates and chlorates in baby food ingredients.

Aesthetic Innovation for Personal Care

In personal care, we recognize the significance of sensorial properties and aesthetic appeal. Our products are manufactured to deliver desired performance and experiences while remaining effective and safe in formulations.

Reliability in Industrial and Laboratory Reagents

In the industrial and laboratory reagents industries, reliability and consistency are important. Our products adhere to exacting standards and undergo quality control testing, ensuring the highest level of quality and consistent performance, with uniquely manufactured products that are free-flowing without the addition of anticaking agents.

At Quality Chemicals, we go beyond expectations, setting new industry standards and redefining excellence. Join us on a journey to reshape the high-purity mineral industry together.

“We bring deep knowledge and tailored solutions to each sector we serve, leveraging our track record of success”

Our Evolution and Expansion

Forging the Path Forward

Quality Chemicals' journey has been marked by remarkable milestones and a relentless pursuit of excellence. In 2004, we achieved a pivotal moment in our evolution with the acquisition of our second manufacturing facility, known today as Purity Chemicals. Both Quality Chemicals and Purity Chemicals, strategically located in Europe, proudly bear the prestigious GMP and ISO certifications that are testaments to our unwavering commitment to quality and consistency.

During 2015, our dedication to excellence was further affirmed when the Spanish health authority extended its recognition to us as Active Pharmaceutical Ingredient (API) manufacturers. This momentous authorization paved the way for us to immerse ourselves in the intricate landscape of the pharmaceutical industry.

Our state-of-the-art facilities and manufacturing flexibility are the cornerstones of our ability to provide a dynamic product portfolio tailored to precise specifications and scalable to meet varying quantity demands. We do not merely manufacture products; we craft solutions that adapt to your unique needs, encompassing synthesis, purification, solvent distillation, drying, milling & micronisation, solutions, and the mixture of solids.

“Our state-of-the-art facilities and flexible manufacturing capabilities allow us to customize products to meet specifications, aligned with regulatory requirements”

Unyielding Quality Unit

The Pillar of Trust

As a certified manufacturer under GMP, we uphold exacting quality control standards across our operations. This signifies our unwavering dedication to delivering products of unblemished quality. Each of our 40+ APIs undergoes meticulous craftsmanship, adhering to ICH guidelines, guaranteeing the unadulterated potency and efficacy that define our reputation.

Comprehensive Quality Control Protocols

Our dedication to quality finds expression through a sweeping array of quality control protocols. These protocols envelop each phase of our production process, leaving no room for compromise:

- Raw Material Testing
- In-Process Controls
- Finished Product Analysis
- Stability Studies
- Environmental Monitoring
- Quality Audits

A Proficient Team of Quality Assurance Experts

Behind our commitment to quality stands a cadre of exceptionally qualified and seasoned quality assurance experts. Their vigilant oversight guarantees that each facet of our quality control activities is carried out with precision, in alignment with the strictest industry standards and regulations.

“Quality is the bedrock of our commitment at Quality Chemicals; we are not just the stewards of quality but also the architects of trust”

End-to-End Comprehensive Services

Your Pathway to Success

At Quality Chemicals, we're not just your supplier; we are your partner in progress, committed to simplifying your journey, enhancing your operations, and helping you achieve unparalleled success. Let us be the foundation upon which you build your success story.

Value-Added at Every Step

True partnership means going the extra mile. We offer an array of value-added services tailored to your needs. Our custom development, product tailoring, particle size reduction, blending, packaging, and private labelling provide flexibility and convenience, ensuring you receive precisely what you require, when you need it.

Technical Expertise and Support

In your journey with Quality Chemicals, you are never alone. Our team of skilled experts is at your service, offering technical support and guidance. Whether you're selecting products, fine-tuning formulations, or seeking solutions to challenges, our experts are just a call or message away. We are committed to your success, and your concerns are always met with thoughtful solutions.

From Concept to Reality

With the customer development and manufacturing service, we cater to a wide range of projects, whether they fall under GMP or non-GMP (ISO) standards. We follow a 10-step approach to ensure your project's success. Starting with the critical task of pinpointing project parameters, we progress through pre-feasibility studies, R&D development, and lab synthesis. We draft Data Technology Transfer (DTT) documents and proceed to Quality Control validation. Compiling Master Batch Records (MBR) and Validation Protocols (VP) before moving on to manufacturing batches for validation. Following that, we conduct stability studies in accordance with ICH Q1A*. And due to our analytical capabilities, we carry our analysis via XRD, IR, PSD, ICP, and Microbiology*. Finally, we submit the Drug Master File (DMF) to health authorities and issue a Letter of Authorization (LoA) to the client*. Throughout this journey, our top priority is aligning with your expectations in terms of specifications, regulatory support, timeline, and cost.

*for GMP/API developments.

“Our aim revolves around simplifying raw material purchasing from initial development to final delivery”

Global Reach and Seamless Distribution

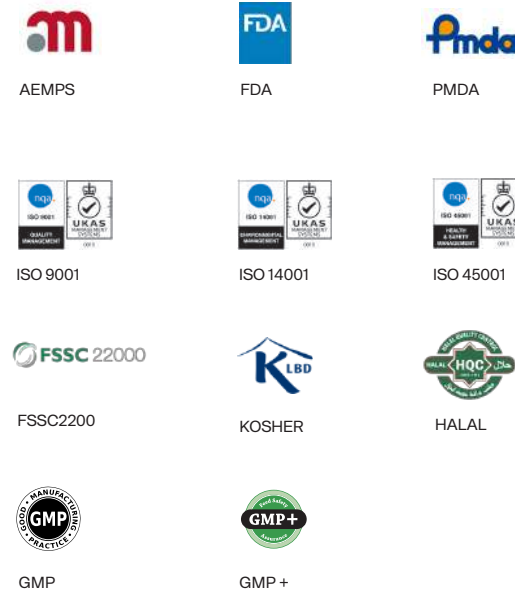

Connecting the World with Quality

Our strategic positioned manufacturing facilities places us in close proximity to major distribution hubs, allowing us to seamlessly dispatch products by sea, air, or road. This proximity allows for efficient transportation, minimizing transit times, and ensuring that your products arrive promptly and in optimal condition.

Regulatory Approvals and Certifications
Meeting the most stringent quality and regulatory standards has earned us approvals and registrations from renowned health authorities and certification bodies.

These approvals and certifications stand as a testament to our dedication to quality, compliance, and the highest standards of product integrity. We do not merely seek to meet industry standards; we aim to exceed them.

Our certifications include, but are not limited to:

“ We take immense pride in our extensive global reach, rooted in a network of approvals, registrations, and strategically located facilities that contribute to ease distribution and delivery to clients worldwide”

Building Lasting Partnerships

Our Commitment to You

We prioritize transparency, communication, and collaboration as the fundamental of these partnerships with our goal being evident: to bolster your success and contribute to sustained growth. We're not just a supplier; we're a trusted partner, devoted to delivering reliable, high-quality services that empower your business.

Customised Solutions for Unique Needs

Strong partnerships are essential for collective success. We invest time and effort to understand your unique needs and challenges. Through close collaboration, we co-create customised solutions aligned with your specific requirements. Together, we chart a course to achieve your business goals and celebrate victories together.

Together, we'll reshape industries and gain a future of success and innovation across diverse sectors, making a lasting impact on the world.

“Our focus extends far beyond delivering products; it centers on nurturing enduring partnerships.”
